## Section 10(b) and Related 20(a) Claim Form

Introductory Section 10(b) Questions  
(answer for all 10(b) statements)**ALLEGED MATERIAL MISREPRESENTATIONS****A. For each challenged statement listed in the chart below, did the Class Plaintiffs prove that the statement was false or misleading when made?**

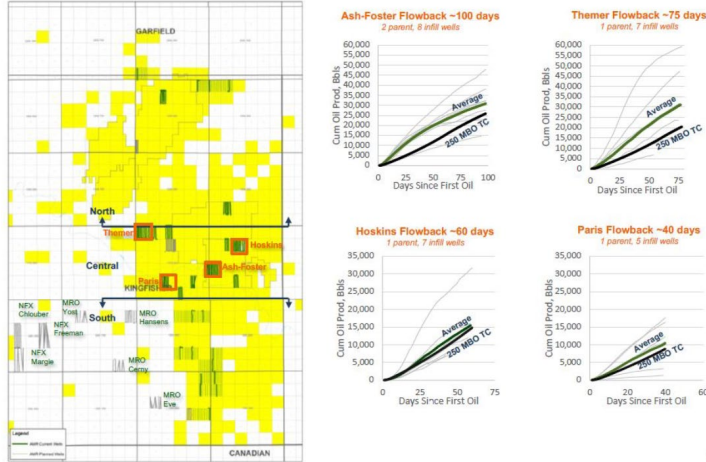

*You may also refer to the attached chart of alleged statements which contains the date, source, and Defendants alleged to have liability for each statement.*

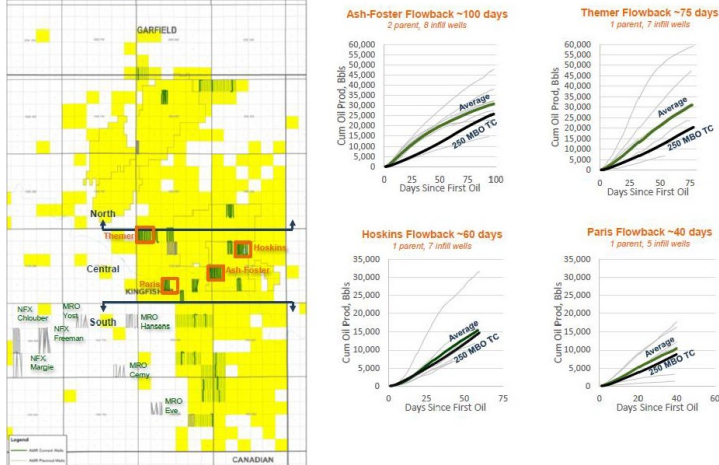

*Where emphasis is added, the emphasized portion of the statement is the only portion that Class Plaintiffs allege to be false or misleading. Additionally, where Class Plaintiffs challenge particular statements or depictions within a larger slides or charts, the challenged portion is identified with a red box.*

No.	CHALLENGED STATEMENT	False or Misleading?	
		YES	NO
1.	"We formed Silver Run II with the objective of acquiring-low breakeven, stacked-pay, oil-weighted assets, preferably with an integrated midstream platform."		
2.	"We see this as a tremendous way to continue our evolution as a low-cost, high-value producer in the STACK."		
3.	"With approximately 120,000 contiguous net acres and <b>about 4,200 gross identified drilling locations</b> , [AMH] is among the largest and most active operators in the STACK. Since 2012, Alta Mesa [AMH] has drilled to total-depth 205 STACK horizontal wells, in order to further delineate and de-risk its approximate 300 square mile position in the up-dip oil window of the STACK. To date, Alta Mesa [AMH] has completed 173 of these wells, with 167 on production. Based upon production through the second quarter of 2017, Alta Mesa [AMH] <b>expects EURs at year end to exceed 650 MBOE per well or approximately 140 BOE per foot of lateral.</b> " [emphasis added]		
4.	"First, we'll talk about the introduction. When we went out to look for targets for [Alta Mesa], we had laid out investment criteria that are shown on slide 5. And both individually as an Upstream and Midstream company and collectively as an integrated platform, this transaction satisfies those criteria."

7.	<p>“We have over 200 wells that we’ve drilled here and we’ve demonstrated the value, and we have confidence in the upside. As an illustration of that, at the end of the second quarter [of 2017], we drilled on the order of 200 wells; of those, over 160 were on production. And of that number, about 114 had sufficient production history to give us confidence that at the end of this year, our year-end reserves will reflect better than 650,000 BOE.”</p>

	 <b>Development Process Underway</b> <u>Spacing test pilots establish basis for development approach</u>  <p>The figure includes a map of Garfield County, Colorado, showing well locations in the North, Central, and South regions. To the right of the map are four flowback curves showing Cumulative Oil Production (Bbls) versus Days Since First Oil for different well patterns:</p> <ul style="list-style-type: none"> <li><b>Ash-Foster Flowback ~100 days:</b> 2 parent, 8 child wells. The curve shows production reaching approximately 50,000 Bbls by day 100, with a 250 MBO TC line.</li> <li><b>Themer Flowback ~75 days:</b> 1 parent, 7 child wells. The curve shows production reaching approximately 50,000 Bbls by day 75, with a 250 MBO TC line.</li> <li><b>Hoskins Flowback ~60 days:</b> 1 parent, 7 child wells. The curve shows production reaching approximately 30,000 Bbls by day 60, with a 250 MBO TC line.</li> <li><b>Paris Flowback ~40 days:</b> 1 parent, 2 child wells. The curve shows production reaching approximately 15,000 Bbls by day 40, with a 250 MBO TC line.</li> </ul>		
11.	<p>“2017 was a year of significant progress for our company marked by several important milestones that we believe has set us up for success in 2018 and beyond. We achieved year-over-year growth in our production, reserves and EBITDAX; <b>we have de-risked our acreage with over 250 operated horizontal wells and a comprehensive scientific and engineering effort to begin systematic development with multi-well patterns.</b> Creating Alta Mesa Resources with the upstream assets of Alta Mesa Holdings and midstream assets of Kingfisher, we believe we have a strong balance sheet that will allow us to execute on our vision for years to come.” [emphasis added]</p>		
12.	<p>“In [AMH’s] STACK play, the company has assembled a highly contiguous leasehold position of over 130,000 net acres. In the fourth quarter of 2017, AMHLP completed 36 horizontal wells in the Osage and Meramec formations. AMHLP had 43 horizontal wells in progress as of the end of the fourth quarter, 22 of which were on production subsequent to the end of the quarter. AMHLP currently has seven rigs operating in the STACK play, with a contracted eighth rig arriving in April and plans to maintain this level for the balance of 2018. In total, AMHLP plans to drill between 170 and 180 gross wells during the year. <b>We expect drilling and completion costs on these wells to average \$3.8 million and our type curve has been approximately 650 MBOE per well.</b>” [emphasis added]</p>

14.	<p>“Importantly, we have up to 90 million cubic feet a day available on wet gas offtake agreements in addition to our existing 260 million a day of operating plant capacity. So <b>despite setbacks in late 2017 and early 2018, with regard to [Kingfisher], our vision for growth remain [sic] strong.</b></p> <p>...</p> <p><b>We believe our margins are going to continue to expand as we build out critical infrastructure and expand production on existing wells</b> through artificial lift optimization. And again, the fanatical focus on production operations generally.” [emphasis added]</p>		
15.	<p>“I’d like to start by reviewing highlights from 2017 and then follow with some key messages of our 2018 program. 2017 and, of course, early 2018 were literally transformational for Alta Mesa as we changed from a private upstream company to a publicly traded fully integrated midstream and upstream company. <b>During this time [2017 and early 2018],</b> we fortified our balance sheet, <b>further de-risked and delineated our Kingfisher County acreage [in STACK]</b> and began a larger-scale development of our STACK assets in the normally pressured naturally fractured oil window. We have accelerated infrastructure investments to further reduce both our capital and our operating expenses and support our growth.</p> <p>....</p>

	<p><b>We have transitioned from spacing tests to development patterns.</b> As shown in the slide deck, we now have 4 multiwell patterns with more than 60 days of flowback and are systematically drilling, completing and bringing more multiwell patterns on production.” [emphasis added]</p>																																																																				
16.	<p><b>“Now, here’s one simple example of a well that we optimized with an ESP, obviously a very good outcome if you’re producing on the order of 800 barrels a day when in fact you are very, very low until you are able to put in the right solution. But the point is there are opportunities like this. We’ve got a lot of effort focused on that.”</b> [emphasis added]</p>

<b>No.</b>	<b>CHALLENGED STATEMENT</b>	<b>YES</b>	<b>NO</b>
	b. Any fraud, whether or not material, that involves management or other employees who have a significant role in Alta Mesa Resources, Inc.'s internal control over financial reporting.		
27.	<p>"I would like to start off by highlighting our announcement that the Board of Directors has approved a share buyback program. When the business combination of Alta Mesa Holdings, Kingfisher Midstream and Silver Run II was conceived, management and investors saw significant opportunity to capture and create long-term value in the STACK. Our belief in that has strengthened as we have integrated these businesses and continue to grow production and progress our knowledge of this incredible resource.</p> <p>The opportunity to invest in our own high-quality acreage and integrated midstream business at recent trading levels <b>offers compelling long-term returns to our shareholders.</b>" [emphasis added]</p>		
28.	<p>"During that 5-year period that preceded our becoming a public company, combining earlier this year with Kingfisher Midstream and Silver Run, we drilled about 250 wells and we went through 4 generations of completions. We also engaged in 7 pattern tests. <b>That period established the basis for the development drilling with multi-well pads that we're engaged in today.</b></p> <p>....</p> <p>Now with regard to our future development, I just showed 5 years of progressive definition and delineation. We've got a large resource. It's in the normally pressured, naturally fractured Black-Oil Window. We've applied engineering and science in a very intensive way to affirm the multi-billion barrel resource that we have. We drilled over 250 wells, defined a mean well result for an original DSU well, in other words, the first well in the pattern being -- a lot of people would use the word the parent well. <b>During that period of time, we performed 7 pattern tests that gave us insight into the intensive multi-well patterns that we see as being necessary to produce all the economic oil that we have here.</b></p> <p>We found that 1,500 feet spacing between wells is a good base case from which to start. We tested the boundaries of those as well, and we had as narrow as 660 feet within a given bench or 330 feet, if you will, as you look at the staggered spacing between multiple benches. That literally would have been – <b>that would infer 24 wells per section.</b></p>		

		<b>False or Misleading?</b>	
<b>No.</b>	<b>CHALLENGED STATEMENT</b>	<b>YES</b>	<b>NO</b>
	We're not going with that, <b>but it does illustrate the potential for down spacing, and in fact, it gave us a lot of confidence because one of our strategic anchors is that we need to limit our downside.</b> That boundary condition of 660-foot spacing still gave us an economic pattern. So that gave us the confidence to move forward with this base case of 1,500-foot spacing.” [emphasis added]

30.	<p>“As discussed in this quarterly report, on February 9, 2018, we completed the acquisition of Alta Mesa and Kingfisher. We are currently integrating these acquisitions into our control environment. In executing this integration, we are analyzing, evaluating and, where appropriate, making changes in controls and procedures in a manner commensurate with the size, complexity and scale of operations subsequent to the acquisitions. We expect to complete the Kingfisher integration in fiscal year 2019 and consequently expect to exclude Kingfisher from our assessment of internal control over financial reporting as of December 31, 2018. The evaluation of internal controls over financial reporting for the Company has required and will continue to require significant time and resources from management and other personnel.</p> <p>....</p> <p><b>Other than the changes described above, there have been no changes in our internal control over financial reporting during the three months ended September 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.”</b> [emphasis added]</p>

- B. For only those challenged statements listed in the chart above that you marked “Yes,” did the Class Plaintiffs prove that the statement was material?**

**If “Yes” the statement is material, identify that/those statement(s) below by Statement Number:**

---

*If you did not list any Challenged Statements in response to Question B, you are done with the Section 10(b) Claim Form and can proceed to the Section 14(a) and Related 20(a) Claim Form.*

*For each Challenged Statement you listed in response to Question B, please complete a packet of Questions 1 through 17, to the extent instructed based on your answers, for each statement. Please be sure to identify on each packet the number of the Challenged Statement being addressed.*

*For any Challenged Statement not listed in response to Question B, you do not need to do anything further for that statement.*

*When you have completed a packet for each statement you answered “Yes” to both Questions A and B, please proceed to the Section 14(a) and Related 20(a) Claim Form.*

---

**Packet of Section 10(b) and Related 20(a) Statement-Specific Questions**  
**(answer Questions 1 through 17)**

*You will be provided a packet of Questions 1 through 17 for each statement which you listed in response to Question B. Please identify the particular statement number from the Chart on pages 1 - 16) that you are addressing in this packet:<sup>2</sup>*

<sup>2</sup> Once the form is agreed and approved by Judge Hanks, the parties will prepare packets for each statement that includes the statement on this first page. The jury can fill out the packet(s) necessary based on their answers to Questions A and B and discard any unnecessary packets after those initial questions.

**FORWARD-LOOKING STATEMENTS**

**2. Was the statement forward looking?**

*Examples of forward-looking statements are (1) statements of the plans and objectives of management for future operations; (2) a statement of future economic performance; and (3) statements containing a projection of revenues, income, earnings per share, capital expenditures, dividends, capital structure, or other financial items.*

☐ Yes

☐ No

*If Yes, answer the next question. If No, skip to Question 6.*

**3. Was the statement identified as forward looking and accompanied by meaningful cautionary language?**

*A “meaningful” cautionary statement is one that identifies important factors that could cause actual results to differ materially from those in the forward-looking statement.*

☐ Yes

☐ No

*If Yes, you have completed the questions regarding this statement.*

*Please start a new packet starting at Question 1 for the next challenged statement which you listed in response to Question B.*

*If this is the last statement which you listed in response to Question B, please turn to the Section 14(a) and Related 20(a) Claim Form.*

*If No, answer the next question.*

**4. Was the statement worded as a guarantee?**

☐ Yes  
☐ No

*If No, you have completed the questions regarding this statement.*

*Please start a new packet starting at Question 1 for the next challenged statement which you listed in response to Question B.*

*If this is the last statement which you listed in response to Question B, please turn to the Section 14(a) and Related 20(a) Claim Form.*

*If Yes, answer the next question.*

**5. For the Defendant(s) identified in Question 1 who made this statement, did the Class Plaintiffs prove any such Defendant actually knew the forward-looking statement was false or misleading at the time it was made?**

☐ Yes  
☐ No

If Yes, identify the Defendant(s): \_\_\_\_\_

**OPINION STATEMENTS**

- 6. Was the statement a statement of fact or a statement of opinion? Please select only one.**

*A statement of fact expresses certainty about a thing, such as the statement “the coffee is hot.” A statement of opinion is a belief, a view, or a sentiment which the mind forms of persons or things, such as the statement “I think the coffee is hot.” Examples of statements of opinion include financial projections.*

☐ Statement of Fact  
☐ Statement of Opinion

*If you selected Statement of Fact, please go to Question 8. You do not need to answer Question 7.*

*If you selected Statement of Opinion, please answer the next question.*

- 7. Did the Class Plaintiffs prove any of the following about the opinion statement:**

		Yes	No
a.	The maker(s) of the statement identified in Question 1 did not, in fact, hold the stated opinion when making it, and the opinion was objectively untrue. <i>If yes, for which maker(s):</i>		
b.	The opinion statement contained statements of fact that were untrue.		
c.	The opinion statement omitted material facts known by the maker(s) in Question 1 at the time it was made regarding the basis for the Defendant’s opinion, and the omission of those facts made the opinion misleading. <i>If yes, for which maker(s):</i>		

*If you marked Yes for any of Question 7(a), (b), or (c), please answer the next question.*

*If you marked No for all three of Question 7(a), (b), and (c), you have completed the questions regarding this statement.*
